Backend-Leaning Fullstack Developer

Fullstack developer with 3 years building and shipping production web apps. Comfortable owning a feature from database schema to deployed UI.

Experience

Software Engineer, Northwind Labs (2022 - Present)

- Rebuilt the checkout API in Django and PostgreSQL, cutting average response time by 42%.
- Led a 3-person team to migrate the frontend from jQuery to React, reducing page load time by 35%.
- Containerized the deployment pipeline with Docker and set up CI/CD, cutting release time from 2 hours to 12 minutes.
- Wrote unit tests to bring backend coverage from 40% to 87%, catching 15+ regressions before release.

Junior Developer, Fieldstone Software (2021 - 2022)

- Built internal REST APIs consumed by 4 other teams using Flask and SQL.
- Automated a manual reporting process with Python scripts, saving roughly 6 hours per week.
- Fixed 60+ bugs tracked in Git issues during the first 6 months on the team.

Projects

- Built and deployed a personal finance tracker on AWS (EC2, S3) with a React frontend and Django REST backend.
- Contributed two merged pull requests to an open-source CLI tool with 800+ GitHub stars.

Education

B.S. in Computer Science, State University (2021)

Skills

Python, Django, Flask, JavaScript, React, SQL, PostgreSQL, Git, Docker, AWS, REST API, Unit Testing
